AutoCAD 2007 introduced the Product Interchange File Format (XDP) (see also external links). AutoCAD is typically used to create models for: Autodesk Design Accelerator which compiles a model into an executable program that can be run on a 3D printer. It was acquired by 3D Systems in August 2011. Autodesk Inventor. The last version of AutoCAD is limited to use with the Microsoft Windows operating system. In 2011, Autodesk introduced the Product Interchange File Format (XDP). Autodesk Revit Architecture allows the import, and more importantly the export of building models.
